

Vaginal Health in Later Life and the Vaginal Rejuvenation Process

Women experience many changes in their vaginal health due to:

Types of changes

Vaginal Laxity

76% of women may experience decreased sensation due to laxity in their lifetimes

Bladder Control Problems

Nearly half of women over age 50 report bladder leakage but only two-thirds of them have spoken to a doctor

Changes to Appearance

Leads to low self-esteem, lack confidence and reduced sexual satisfaction

Vaginal Dryness

58% of post-menopausal women experience vaginal dryness

These are just some of the problems that women experience. They can cause pain, discomfort and affect their daily life.

Treat, don't tolerate! Vaginal Rejuvenation Treatment

Votiva is a non-invasive treatment for Internal and External areas of the vagina:

- A small wand is applied to the area
- The device gently applies heat to the affected area
 - It causes controlled damage to the skin tissue
- Triggers natural healing mechanism and tightening of vagina
- Patients feel a heating sensation during and for a few hours after
 - No downtime - results felt immediately!

Hear from those who have tried it

"I feel a million times better!"
"Great experience with Votiva!"
"Really easy procedure and helped with my leakage too!"
"Turned the clock back at least 20 years"
"My quality of life has improved dramatically"
